v.	Biotechnology Facility	X	X	X	X	X	X	X	A	A	A	5

And to further amend Section 14: Definitions, 2. Selected Words and Terms:

1. By modifying the definition of "Biotechnology Facility" as follows:

BIOTECHNOLOGY FACILITY – A research, experimental, or testing or product development laboratory or manufacturing facility utilized for the application of scientific study of biological and life processes for medical application instruction and/or commercial purposes, but limited to uses which satisfy the safety requirements described herein as Biosafety Level 1 and Biosafety Level 2 as defined in Section 14 of the Zoning Bylaw and as otherwise regulated by the Town of Walpole. Any activity that includes a Biosafety Level above 2 is prohibited, except as otherwise expressly permitted elsewhere in the Zoning By-law.

2. By inserting, in order, the following definitions to read as follows:

Biosafety Level 1: Biosafety Level I include activities, practices, equipment, safety equipment, and facility design and construction that are appropriate for undergraduate and secondary educational training and teaching laboratories, and for other laboratories in which work is done with defined and characterized strains of viable microorganisms not known to consistently cause disease in healthy adult humans. Biosafety Level 1 represents a basic level of containment that relies on standard microbiological practices with no special primary or secondary barriers recommended, other than a sink for hand washing.

Biosafety Level 2: Biosafety Level 2 includes activities, practices, equipment, safety equipment, and facility design and construction that are appropriate for and applicable to clinical, diagnostic, teaching, and other laboratories in which work is done with the broad spectrum of indigenous moderate-risk agents that are present in the community and associated with human disease of varying severity. To qualify for this designation such agents shall be, with good microbiological techniques, capable of being used safely in activities conducted on the open bench, provided the potential for producing splashes or aerosols is low. Hepatitis B virus, HIV, the salmonellae, and Toxoplasma spp. are representative of microorganisms assigned to this containment level. Biosafety Level 2 shall be deemed appropriate when work is done with any human-derived blood, body fluids, tissues, or primary human cell lines where the presence of an infectious agent is be unknown. Even though organisms routinely manipulated at Biosafety Level 2 are not known to be transmissible by the aerosol route, procedures with aerosol or high splash potential that may increase the risk of such personnel exposure shall be conducted in primary containment equipment, or in devices such as a safety centrifuge cup. Other primary barriers shall be used as appropriate, such as splash shields, face protection, gowns, and gloves. Secondary barriers such as hand washing sinks and waste decontamination facilities shall be available to reduce potential environmental contamination.
