

Hi David,

We emailed you on March 3rd requesting a discussion regarding your project setbacks to which you responded on March 6th saying that you would call us in the next few days. As we haven't heard from you since the previous ZBA meeting on Monday March 1 regarding any compromise on the current setbacks you are offering which conflict with the town requirements of 40 feet for a Limited Manufacturing District, we just want to let you know that we will continue to object to your current plan proposals. You mentioned to us in the past that homes at your end could be reconstructed and reconfigured to help meet our setback requirements, however there has been no communication since to support this. If decks were just removed from the adjoining homes you were building, we feel that this would at least provide a chance that the 40 feet guidelines could be met, but we are as mentioned, still yet to hear from you regarding any compromise. We don't want to blindsides you which is why we are reaching out to the board with our objections also, but still remain happy to discuss any compromise you can offer at your end.

Kindest regards.

Victor & Brenda Muler.
