Board of Sewer & Water Commissioners

RE: 51-53-55 Summer Street
AKA Cedar Crossing & Cedar Edge Comprehensive Permit

DATE: April 2, 2020

The Board of Sewer & Water Commissioners reviewed and discussed correspondence with regard to above subject. This Commission is mandating that the water main for this project must be looped. Additionally, this Board would like to state that irrigation minimization should be encouraged in an effort to help meet the Water Management Permit criteria which is 65 gallons per day per capita.

It is expected that the applicant will appear before the Sewer & Water Commission at some future date to discuss their utilities.

The Applicant looks forward to an informational meeting with the Sewer and Water commission. The proposed water system will be looped back to Summer Street and looped internally where practicable. The Applicant will also endeavor to use drought resistant plantings and minimize irrigation.
