

Hello,

As a resident of South Walpole living off Winter Street south of Water and west of Summer, I implore your boards to mandate a reduction in the size of the housing project to be built off Summer Street.

The increased traffic and strain on community resources will be astronomical. As of now, our kids already have no safe passage to Boyden. Allowing a housing development of such incredible size is clearly not suited for our small community.

While affordable housing is greatly needed, much can be accomplished with a reduced number of units. I request the board require Omni to reduce the number of units being constructed in South Walpole.

Thank you.
