I am firmly against waivers for the height increase and I am beginning to wonder who the ZBA represents, a developer who will build/stabilize/exit within a short period of time? or the constituents of the town, who have clearly objected, that pay the ZBA salary with our real estate taxes?

There is a small community within the town at stake here. This development is going to change EVERYTHING about South Walpole - starting with paving over the small common and ending with a doubling of population in an area that is already of traffic concern.

Please, remember there are families and schools that will be impacted here. Omni Development does not care. We rely on you to advocate for us.
