Good Evening,

After watching the most recent ZBA meetings, it is with much frustration and disappointment that I feel inclined to voice my concerns again.

I am shocked and saddened that the committee is considering allowing or compromising on the requested 70 foot waiver.

This requested waiver is ludicrous and should absolutely be denied. The comments from the Walpole Fire Department alone should compel the committee to deny this waiver. Not only is it a danger to the people living there, it is also completely uncharacteristic to the neighborhood. Omni was well aware they would need to request this waiver, and without regard for the town or its bylaws, designed their project with the sole focus of making money for themselves. They have taken advantage of Walpole's 40b status and have continuously shown very little, if any, concern for how their proposed project fits into the town of Walpole. I urge you to reconsider compromising to allow 5 story buildings and DENY the waiver entirely.

I also continue to have concerns about the water and the protection of the towns water supply with the construction of this project in this area.

I sincerely hope that your decisions are guided as much by the impact this will have on current South Walpole residents as they are the potential residents of this project.

Please do not approve or comprise on the 70 foot waiver requested and further destroy the character of South Walpole.

Thank you,

Paul and Marissa Falcone
