Subject: Diamond Hill Estates, Walpole
Fire Truck Turning Accommodation

Dear Lou:

In response to the request during the recent mediation session, we took another review of the ladder truck turning into Dupee Street from High Plain Street with the possibility of modifying the curb radius and relocating the utility pole on the corner. The revised diagram illustrates that when we shift the pole to the west enabling the corner radius to be increased or flattened a bit, the ladder turn should be able to be made with much less centerline encroachment on High Plain Street. As shown in the plan, with the curb modified and pole relocated, the encroachment is reduced to about 1 foot +/- at maximum for a much shorter distance. This was coordinated with GLM to determine an acceptable pole location.

If you have any questions, please don't hesitate to let me know.

Very truly yours,
GREEN INTERNATIONAL AFFILIATES, INC.

Bill
