

## **STATUS REPORT #1**

### **Water Main Replacement Project**

**To:** Residents of Lincoln Road and Granite Street  
**From:** Walpole Water Department  
**Date:** August 2, 2016

Dear Residents:

The intent of this notice is to keep you informed regarding the upcoming water main replacement project in your neighborhood. A summary of the important information related to this project is as follow:

**A. Scope of Work:**

The existing water main in Lincoln Road from West Street to Plain Street, and in Granite Street from Lincoln Road to Kittredge Street will be replaced. The work will include installation of new water main, valves, hydrants, and new water service to edge of each property.

**B. Tentative Schedule:**

The construction activities will start this week and continue through October. Work hours will be from 7:30 am to 4:00 pm. There will be no work on weekends and holidays, with the exception of emergencies, if any.

**C. Traffic Disruptions:**

Work begins at West Street and will move along Lincoln Road. Then, it will be in Granite Street starting at Lincoln Road moving toward Kittredge Street. Traffic will be re-routed around the active construction zone and alternative routes will be posted with detour signs. Please follow the signs or seek other alternative routes to avoid the active construction zone and prevent potential delays. In addition, heavy construction activity will be in front of each property for a day or so. This will limit access to that driveway for a few hours until the active construction zone passes your house. Emergency Departments, Postal Service and school buses will have access around the active construction zone as needed.

**D. Water Service Disruptions:**

It may be necessary to shut off the water to limited portion of the neighborhood once or twice during the course of this project. The shut-down will be planned with advance notice and for limited duration. Once the main line is installed and tested, a new shutoff valve will be installed for your house along the edge of your property. The Contractor will need to shut off water service to each house for about 2 hours to connect each property to the new water main. The water service interruption for this purpose will be limited to one house at a time and will not affect the entire neighborhood.

**E. Additional Information:**

If you need additional information or have any questions, please contact Walpole Water Department at 508-660-7307.
